HYPER ANALOGUE PRODUCTION

天 地

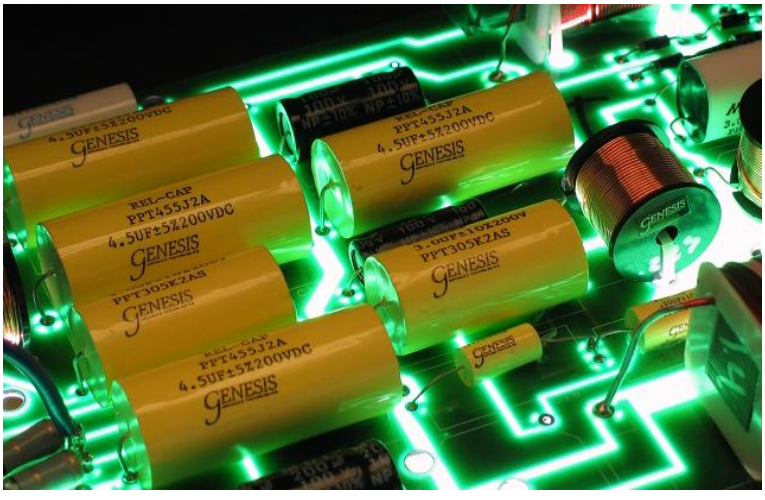

by GENESIS ADVANCED TECHNOLOGIES

The main loudspeaker “Tian” (Heaven) is a technological *tour de force*: a 5-way passive dipole design in a sealed cabinet. Utilizing the transducers developed by Genesis over the past 35 years, the new speaker has *four* 8-inch woofers in isobaric configuration and a carefully tuned circuit in the crossover allowing your amplifier to deliver superb bass without needing ports.

Backing them are two 6.5-inch solid aluminum mid-bass couplers, a 3.5-inch solid titanium midrange, and ring-radiator planar-magnetic (ribbon) tweeters front and back with separate crossovers – all integrated seamlessly by a 5-way crossover with a high-pass at 32Hz.

TianDi (Heaven and Earth) is the first product from the powerful union between Genesis Advanced Technologies’ high-end loudspeaker technology and Hyper Analogue Production’s efficient and rigorous production capabilities in China.

The highs sparkle, the midrange is warm and mellow, and imaging and soundstage are exceptional. With two mid-bass couplers plus four 8-inch woofers in an isobaric configuration, the bass is authoritative.

We believe that bass is the foundation of music – hence "Earth" (Di) for the woofer towers. We have leveraged on the servo-bass technologies that Genesis has refined over the past 35 years to deliver hall-filling, tight, dynamic and accurate bass that Genesis is known for.

This integrates with the main loudspeaker below 90Hz to deliver downwards all the way to 24Hz – covering the vast majority of music.

The main speakers are a fully capable full-range pair that would satisfy most music-lovers and deliver for most music. Add the woofer towers and they will fill an auditorium.

Not a dome – the Genesis Ring-radiator Ribbon Tweeter

Proving that trickle-up technology as well as trickle-down technology benefit our design process, everything learned from developing the affordable, multi-award winning G7-series: isobaric woofers, bamboo composites, simpler crossover configurations, etc. have made this loudspeaker possible.

TianDi – Heaven and Earth: an affordable, attainable flagship 4-tower loudspeaker from a 35-year-old brand with a depth of technology, design and experience.

Tian (Heaven)

Frequency Response:	32Hz to 40kHz, ± 3dB
Sensitivity:	88 dB 1 watt 1 meter
Input Impedance:	4 ohms (nominal)
HF Transducers:	Two 1" Ring-Radiators (Front & Rear)
Midrange Transducer:	One 3.5" Solid-titanium cone
Mid-Bass Transducers:	Two 6.5" Solid-aluminum cones
Bass Transducers:	Four 8" Ribbed-aluminum (Isobaric)
Loudspeaker Controls:	Front Tweeter Level (±2dB) Midrange Level (±2dB)
Dimensions:	H 64 " x W 24 " x D 22 " H 1620mm x W 610mm x D 560mm
Weight (each):	176 lbs (80 kg)
Finish Options:	High gloss black lacquer

Di (Earth)

Frequency Response:	24Hz to 150Hz, ± 3dB
Input Impedance:	75k ohms
Bass Transducers:	Four 8" Ribbed-aluminum (Servo)
Loudspeaker Controls:	Bass Gain Low-Pass Frequency
Servo-Controlled Bass Amplifier:	1 x 600W
Dimensions:	H 64 " x W 18 " x D 21 " H 1620mm x W 460mm x D 530mm
Weight (each):	139 lbs (63 kg)
Finish Options:	High gloss black lacquer
